Lite Kit Information

Wood Flush

Option 1 - Factory Glazed

Five Lakes Mfg. will factory glaze upon request. Using this option the lite beads and glass are installed in the door at the factory.

Option 2 - Field Glazed

If Five Lakes is not supplying glass, the flush lite beads are installed on one side and the other side is precut and unassembled for installation with caulk and nails after glazing in the field.

Wood Lip

Option 1 - Factory Glazed

Five Lakes Mfg. will factory glaze upon request. Using this option the lite kits and glass are installed in the door at the factory.

Option 2 - Field Glazed

If Five Lakes is not supplying glass, the lip kits are assembled at the factory for glazing and installation in the field.

Metal Vision

Option 1 - Factory Glazed

Five Lakes Mfg. will factory glaze upon request. Using this option the Metal Vision Kits and glass installed in the door at the factory.

Option 2 - Field Glazed

If Five Lakes is not supplying glass, the Metal Vision Kits provided uninstalled for glazing and installation in the field.

NOTES:

- On doors with **cutout only**, Five Lakes Mfg. **does not** square the corners of the cutout.
- Wood lites are set for 1/4" glass or upon request for different glass thickness.
- To give our kits a cleaner look we have **eliminated screws** in Wood Lip Kits. At the jobsite these kits will need to be installed with caulk and nails.
